Premier Sponsor

The Podiatry Foundation is committed to advancing
the podiatry profession by funding grants in
podiatric medical education, research, and the
creation of innovative endeavors within the field.

Objectives:

Upon completion of this educational program, the attendee will accomplish the following:

1. Learn how to recognize and manage various surgical complications.
2. Learn how intraoperative techniques of bunion surgery can affect outcomes.
3. Review past and learn new wound care techniques for best outcomes.
4. Learn new medical and pharmacologic options for management of diabetes.
5. Learn skin lesion pathology and treatment options.
6. Review bunion surgery procedure options and modern surgical advancements.
7. Learn conservative and surgical treatment options for tarsometatarsal injuries.
8. Learn venous and arterial pathology and treatment.
9. Learn advanced techniques in limb salvage.
10. Learn pharmacologic and procedure options for treatment of foot pain.
11. Learn primary care challenges in education and training and maintaining a work-life balance.
12. Participate in a panel discussion on various patient problems and pathology with experts in the field with seasoned physicians. An active, open discussion will take place on the standards of care and how personal preferences and training can influence medical and surgical care from past to present.
